puppies how to properly socialize and play, in addition to providing valuable training information to owners.

The first class is an informational session for the owners to participate in without their puppies. This class provides the foundation for understanding how your dog learns and communicates. We will also discuss common questions and problems about puppy hood.

The remaining 6 classes are split into three sections: training, socialization and handling, and play. During the training section owners will learn positive training techniques for sit, down, stay, come, and how to get your dog to walk on a leash without pulling. We will also discuss how to teach your dog to "leave it," "drop it," and other useful commands.

The socialization and handling section is focused on exposing the puppies to all different kinds of objects, people, sights, and sounds. In addition, we will work on handling your puppies to get them used to being restrained and touched all over.

Last, but certainly not least, the puppies will have plenty of play time with their classmates. This play time is fun for the puppies and owners, but is also the primary way that dogs learn bite inhibition.

By the end of the 7 weeks you will have the tools necessary to train your puppy to be a well-mannered dog that you are proud to own.

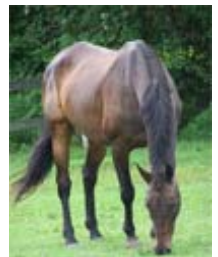

For more information or for the class schedule, call Lindsay Picard at (860) 747-1612 or email her at lindsaypicard@hotmail.com.

Spring Equine Vaccine Reminder

For those of you with horses, we would like to remind you that vaccine time is right around the corner. With spring quickly approaching, we are starting to schedule ahead for these types of farm calls.

Generally, we begin administering spring vaccines any time after April 1st. This allows for the encephalitis vaccine to remain effective for the entire season. Earlier vaccination means that we should vaccinate twice annually.

Please also note that when you schedule vaccines with our Doctors, we will do our best to accommodate each individual. However, there certainly may be times where we can't do all of the requested visits in an afternoon. In such circumstances, we will be more than happy to work with you in scheduling these for a separate farm call.

Why Beckett & Associates website moved to Beckettvet.net

Beckett & Associates Veterinary Services, LLC domain name, Beckettvet.com, was originally registered through GoDaddy.com and was recently transferred over to 1and1.com. Somewhere during the process there was a "error in the system" at

Services, LLC and is a free service to those looking to adopt or rescue their next - or first - pet.

Visit [Pet Angels](#) to find out more

1and1.com. The domain name Beckettvet.com was taken from Chip Beckett and quickly had another owner who was selling Beckettvet.com for approximately \$5,000. 1and1.com had stated that the loss of the domain name was due to errors on their part and they were going to correct the mistake.

It has been over two weeks since the domain name was stolen and 1and1.com has still not fixed their "error". After further investigation it became apparent that this "error" was not an isolated incident and they have a history of being involved in such "errors". There is no time frame as to when the domain name will be returned so the Beckett & Associates Veterinary Services, LLC website has been placed under the domain name of "beckettvet.net". In addition to moving the website, all email addresses associated with beckettvet.com have also been changed as previously described in detail above.
