New Technologies

With the continued uncertainty of global markets, our clients are being forced to analyze their design and manufacturing systems and procedures in an effort to cut costs. Looking to Northeast Mold & Plastics as a partner, we have worked with several companies to assist with these measures. While we are never willing to sacrifice quality for cost savings, we are always willing to invest in new technologies and systems to help support our clients. One of these technologies which Northeast Mold Plastics has invested heavily in is Two-Shot Molding. Though the term has become common language within the plastics sector, not many people comprehend precisely what it is, how it works, and how it can be a benefit to their product line. To assist those we have produced a **Virtual Simulation** which will explain in detail.

To learn more about Two-Shot Molding please [click here](#).

In an effort to keep pace with our production schedule, Northeast Mold & Plastics is pleased to announce the addition of another molding machine to our arsenal. Just purchased and installed, this 50ton Electric ALLDRIVE Arburg molding machine (model #320A 500-170) is equipped with all the "Bells and Whistles" including multi-sequential core pull. It is part of a completely self-contained and automated cell consisting of:

- Star XQ-600VC Robot
- Novatec automatic resin drying, mixing (concentrate/resin and virgin/regrind), and loading system
- Moditec press-side resin regrinder
- Wittman TemPro mold temperature control unit
- HFA conveyor, parts separator, and weight scale system

Latest News

During September 23-25, Northeast Mold & Plastics exhibited at the MD&M Midwest 2008 show at the Donald E. Stephens Convention Center in Rosemont (Chicago), IL. According to show promoters there were 26,478 registered attendees. The show proved to be a success - More than 147 companies and individuals stopped at our booth interested in our products and services. We are currently following up on those leads and hope to have more to report in 1st Quarter 2009's Newsletter.

Success Stories

At Northeast Mold & Plastics we understand that in order to earn your continued business, we need to earn your trust. In doing so, one of the major components is to produce a quality product. On a monthly basis our Quality Assurance Department tracks every part molded, every part shipped, and any part returned. This data is collected and maintained as part of our ISO9001:2000 process. We are proud to share with you the final tally for Third Quarter 2008:

Month	# of Shipments	Quantity Shipped	# of RMA's	Quantity of RMA's	Return Percentage
Jul-08	133	1,658,451	1	1,000	0.06%
Aug-08	165	1,692,789	0	0	0.00%
Sep-08	191	1,785,810	0	0	0.00%

As you see Northeast Mold & Plastic continues to produce quality product, month after month, with less then a 0.06% return rate! Statistics as outstanding as this could not be possible without the dedication and expertise of our Quality Assurance Department:

Wayne Mergel – Quality Assurance Manager
 Harold Sanden – Quality Assurance Inspector First Shift
 Kim Blasco – Quality Assurance Inspector Second Shift

Collectively their team has over 85 years of Quality Assurance and Inspection experience!
